Calendar Listing

WHAT: “Eye on the Storm: Predicting a Hurricane’s Path of Destruction” by Dr. Isaac Ginis

WHEN: Thursday, Oct. 7th at 6:00 pm

WHERE: Smithsonian’s National Museum of Natural History
10th Street & Constitution Avenue NW
Baird Auditorium, Ground Floor

LIVE WEBCAST: <http://ocean.si.edu/ocean-videos/eye-storm/>

THIS EVENT IS FREE AND OPEN TO THE PUBLIC

With hurricane season in full swing, the National Museum of Natural History presents “Eye on the Storm: Predicting a Hurricane’s Path of Destruction.” Join us Thursday, Oct. 7th, at 6:00 pm for an evening discussion with Dr. Isaac Ginis, a Professor of Oceanography at The University of Rhode Island and an expert in hurricane modeling. Dr. Ginis will discuss how scientists observe, model, and forecast hurricanes around the world and take questions from the audience. His lecture, “Eye on the Storm,” is the second installment of *Changing Tides: A Series of Ocean Discussions*, in which top marine scientists talk about current research and how it is helping to change the tide in ocean science and conservation.

This series is presented in collaboration with the Centers for Ocean Sciences Education Excellence (COSEE) and made possible by a grant from the National Science Foundation.

For more information about this lecture and the *Changing Tides* series, please visit:
<http://ocean.si.edu/ocean-news/changing-tides/>.

ASL interpretation will be provided.
